Job Description

EWI - Global Talent Solutions

Ewi is a specialist recruitment & mobilisation consultancy headquartered in the City of London. We specialise in senior and highly technical positions across the engineering, technology and construction sectors worldwide.

Position - Wind Site Manager

Role Summary

Wind farm site managers, who are also known as wind energy operations managers, oversee the daily operations of wind farms. They are responsible for ensuring staff are maintaining and operating the equipment and that the wind farm is producing energy as expected. They monitor the production levels and interact with customers as part of their regular duties. Wind farm site managers are also responsible for ensuring that safety protocols are followed and that business records are properly maintained. They may also be involved with training or hiring staff for specific roles and responsibilities.

Essential Responsibilities:

- Lead and develop a team that represents values and high standards of performance
- Provide effective leadership that achieves a highly aligned,
